-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The aluminum flakes according to claim 1, wherein there is a plurality of species for the layers adjacent to layers (A1) and (A2), to be chosen from:

- 1) Layers (C1) and (C2) (claims 2 and 15);
- 2) Layer (E) (claims 6, 8, 11, 16, and 19);
- 3) Layer (F) (claims 7, 20, and 21);
- 4) Layers (C1), (C2), and (E) (claim 17); and
- 5) Layers (C1), (C2), and (F) (claim 18).

Accordingly, Applicant is required to elect a single exact choice for the additional layer(s) from choices 1) – 5), listed above.

It is noted that claims 1, 3-5, 10, and 12-14 do not require an additional layer, and will be searched with the elected species.

Art Unit: 1611

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The following claim(s) are generic: claim 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common technical feature in all groups is an aluminum flake comprising layers (A1), (B), and (A2), as described in claim 1, and specifically an aluminum flake comprising layers (D1), (B), and (D2), as described in claim 3 (i.e., wherein $z = 2$). This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Coulter et al., US Patent 6,150,022, disclose bright metal flake based pigments comprising a core reflector material of aluminum (col. 6, lines 34-37) coated on both sides with a dielectric material of silicon dioxide, i.e., SiO₂ (col. 9, lines 40-41) having a thickness of from about 200nm to about 600nm (col. 9, lines 59-60).

Art Unit: 1611

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
